2002 Publications, by Category and Page Number

The index appears in three parts. The first, which begins below, lists publications by major category, and within categories, by page number. In order, the categories are Original Articles, Concise Communications, Editorials, SHEA Position Papers, Special Reports, Reviews, Readers' Forum, the Sections, Letters to the Editor, and Book Reviews. Items published in Medical News are not indexed.

This comprehensive list is followed by the Author Index (page 777) and the Subject Index (page 783). Each entry in these two indices points to a major category and page number in the comprehensive list below, where the complete citation may be found.—Ed.
